# SCAFFOLD BOARDS

## WHY ARE **MASTER PLANK** LAMINATED SCAFFOLD BOARDS THE PLANK OF CHOICE?

**MASTER PLANK** is an engineered wood product designed specifically for use as a scaffold board. The unique process by which it is manufactured disperses the inherent defects found in solid-sawn lumber. Natural characteristics such as knots and wane are rearranged to maximize strength and minimize warping and splits.

**MASTER PLANK** is homogeneous and has superior strength properties.

**MASTER PLANK** is proof-tested to ensure compliance to the OSHA & ANSI A10.8-2001 & can/csa-s269.2-m87 Standards and is stamped accordingly.

**MASTER PLANK** is manufactured from spruce veneers, making it the lightest weight laminated wood scaffold plank on the market.

**MASTER PLANK** is remarkably durable due to its use of critically selected spruce veneers and waterproof exterior adhesive.

**MASTER PLANK** is manufactured under the ISO 9001 Quality Certification System and is inspected under the guidance of an independent nationally recognized inspection agency.

**MASTER PLANK** is manufactured from forests managed and certified according to the ISO 14001 environmental standard and the ISO 9002 quality standard.

Standard Sizes			
Thickness	Width	Length	Weight (plf)
1 1/2"	9 1/4"	8-24'	3.2
	11 3/4"	8-24'	3.9
1 3/4"	9 1/2"	8-24'	3.6
	11 3/4"	8-24'	4.5

**Note:** Other thicknesses, widths and lengths are available on a custom order basis.

## **MASTER PLANK** IT'S NOT JUST ANY SCAFFOLD BOARD

### MASTER PLANK SCAFFOLD BOARD SPAN TABLES (CANADA)

One Span (Simple) L/80	Dry Use (<19% Moisture Content)			Wet Use (>19% Moisture Content)		
	1-1/2"x9-1/4"	1-3/4"x9-1/2"	1-3/4"x11-3/4"	1-1/2"x9-1/4"	1-3/4"x9-1/2"	1-3/4"x11-3/4"
50 psf	9' - 6"	11' - 6"	11' - 6"	9' - 0"	10' - 6"	10' - 6"
75 psf	8' - 6"	10' - 0"	10' - 0"	8' - 0"	9' - 0"	9' - 0"
500 lb.	6' - 6"	8' - 6"	9' - 6"	5' - 0"	7' - 0"	8' - 6"
Light Duty	8' - 6"	10' - 6"	10' - 6"	8' - 0"	9' - 6"	9' - 6"
Heavy Duty	7' - 0"	8' - 0"	8' - 0"	6' - 0"	7' - 6"	7' - 6"

**Note:** Above Span Tables are based on a deflection limit of L/80 per Canadian Standards Association (CSA) requirements. Light Duty = 25 psf uniform load plus 250 plf across the plank width at midspan. Heavy Duty = 75 psf uniform load plus 265 plf across the plank width at midspan. Refer to CAN/CSA-S269.2-M87 Standard, Section 5.2.1 for load diagrams.
